INTRODUCTION

Publications

DBS responsibilities in the Canadian statistical system concern the whole range of statistics on economic and social activities in Canada. The number of subjects dealt with is therefore quite large. This catalogue lists approximately 1,100 publications grouped by subject areas, and designed to include the statistical information for each area which is most commonly used. It is obviously impossible to publish compilations which will serve every purpose or need. Therefore, users should keep in mind that a considerable volume of unpublished information is available from DBS on request.

Data Files and Unpublished Information

This is the first catalogue issued by DBS which in addition to providing regular information on the publications program contains a section on data files and unpublished information. Because DBS activities in this area have increased, this section is likely to enlarge with future issues of the catalogue. The descriptions provided are in sufficient detail in most cases for the placing of orders. Included with the description for each subject area is the title of the officer or the name of the section to contact for further information. If in doubt, you should contact the Inquiries Section, DBS, telephone 992-2959, area code 613. Like all information from DBS, data files are subject to the clauses of the Statistics Act which protect organizations and persons from individual disclosure.

For further details on the availability of data files and unpublished information, please refer to Part II of this catalogue. See page 329.

Local Access to DBS Publications

DBS has 8 regional offices located in St. John's, Halifax, Montreal, Ottawa, Toronto, Winnipeg, Edmonton and Vancouver, and each of them (with the exception of Ottawa which is served by the headquarters Inquiries Section) keeps on the premises a file of current publications available for public use. Also, DBS publications are generally available at libraries including the National Library, provincial legislature libraries, major public libraries and university libraries. The DBS library in Ottawa contains a complete collection of all Bureau publications issued since the Bureau was founded in 1918. A catalogue of this collection is available. See listing for catalogue number 11-504.

How to Use this Catalogue

For the seasoned user of DBS information, the table of contents beginning on page iii will lead him to the statistics he wants. For the non-expert however, the title, subject, and commodity index beginning on page 224 will usually be helpful. It contains several thousand entries arranged in alphabetical order and is cross-referenced to show the several publications (if such is the case) in which information on a given subject may be found.

Concerning the catalogue numbering system, it will help to know that:

- (1) the first digit of the number indicates the major group (manufacturing, transportation, etc.);

DOMINION BUREAU OF STATISTICS

- (2) the second digit indicates the sub-group of the major group; for example, under manufacturing, textiles and apparel, wood products;
- (3) the third digit indicates the frequency of publication, such as occasional, annual or more than once a year;
- (4) the fourth and fifth digits are permanent numbers for each publication.

How to Order Publications

When ordering DBS publications please keep in mind the following points:

- (1) Send your order to Publications Distribution, Dominion Bureau of Statistics, Ottawa.
- (2) Please quote the catalogue number as well as the publication title when ordering.
- (3) Please enclose payment with your order. Cheques or money orders should be made payable to the Receiver General of Canada. (For your convenience, arrangements can be made through DBS Publications Distribution to open a deposit account with the Queen's Printer. You may deposit an amount (a minimum of \$10) against which publications can be ordered in future.)
- (4) You can order the full publications service and receive all DBS publications automatically as soon as they are issued.
- (5) If you find it more convenient, DBS publications may also be ordered from Queen's Printer bookstores in the following cities: Halifax, Montreal, Ottawa, Toronto, Winnipeg, Vancouver.
- (6) Discounts are allowed under certain conditions, the main ones being on sales to Federal Government Departments, to independent retailers, to libraries and on bulk orders of 1,000 copies or more. For details, please get in touch with Publications Distribution, DBS.

How to Make Inquiries

If you are aware of the section of the Bureau to which a specific inquiry should be addressed, by all means so address it. If not, your best course is to send it to Inquiries Section, Dominion Bureau of Statistics, Ottawa (telephone 992-2959, area code 613).

If you wish to telephone DBS for information and are using long distance, it is obviously best if you can contact the appropriate DBS section with your first call. The Inquiries Directory on page ix contains the DBS telephone numbers most commonly used by the public. Because the names of officers who answer inquiries in the various DBS divisions sometimes change, the names are not included, and the telephone numbers have been listed by the most common headings and subheadings of subjects to be dealt with. If in doubt about whom you should call, please contact the Inquiries Section.

INTRODUCTION

Publications

Au sein du système statistique canadien, le B.F.S. a pour fonction de publier la statistique de toute la gamme de l'activité économique et sociale au Canada. Son catalogue contient environ 1,100 titres de publications groupées par sujet et destinées à fournir des renseignements statistiques sur chacun des domaines où l'information est le plus en demande. Il est évidemment impossible de publier des statistiques qui répondent à absolument tous les besoins. Les utilisateurs se rappelleront donc qu'il existe une masse de renseignements non publiés qu'ils peuvent obtenir en s'adressant au B.F.S.

Fichiers de données et classements spéciaux

Le présent catalogue est le premier publié par le B.F.S. qui contienne, outre les renseignements ordinaires sur le programme de publications, une section consacrée aux fichiers de données et aux renseignements non publiés. L'accroissement de l'activité du B.F.S. dans ce domaine laisse prévoir que cette section occupera vraisemblablement une place de plus en plus grande dans les prochains catalogues. Les descriptions sont assez détaillées pour que l'on puisse passer des commandes, dans la plupart des cas. Elles s'accompagnent du titre du fonctionnaire ou du nom de la section à qui l'on peut s'adresser pour de plus amples renseignements dans chaque domaine particulier. Dans le doute, on doit se mettre en rapport avec la Section des renseignements, B.F.S., numéro de téléphone 992-2959, indicatif régional 613. Comme tous les renseignements du B.F.S., les fichiers de données sont assujettis aux dispositions de la Loi sur la statistique, qui protège les organismes et les particuliers contre la divulgation de renseignements individuels.

L'introduction à la 2^e partie du présent catalogue donne des détails sur la façon d'obtenir des fichiers de données ou des renseignements non publiés. (Voir page 337.)

Accès aux publications du B.F.S.

Le B.F.S. a huit bureaux régionaux, qui sont situés à Saint-Jean (T.-N.), à Halifax, à Montréal, à Ottawa, à Toronto, à Winnipeg, à Edmonton et à Vancouver, et chacun d'eux (sauf celui d'Ottawa, qui est desservi par la Section des renseignements du bureau central) conserve un fichier des publications courantes que le public peut consulter sur place. De plus, on peut généralement trouver les publications du B.F.S. à la Bibliothèque nationale, dans les bibliothèques des assemblées législatives des provinces, dans les grandes bibliothèques publiques et dans les bibliothèques universitaires. La bibliothèque du B.F.S. à Ottawa possède la collection complète de tous les ouvrages publiés par le Bureau depuis sa fondation en 1918. On peut se procurer le catalogue de cette collection, qui porte le numéro de catalogue 11-504.

Comment se servir du catalogue

Celui qui utilise souvent les renseignements du B.F.S. pourra trouver les publications statistiques qu'il désire en consultant la table des matières à la page iii. Quant au non-initié, l'index des titres, des sujets et des produits qui commence à la page 224 pourra lui être utile. Il contient plusieurs milliers d'inscriptions disposées par ordre alphabétique, avec des renvois indiquant les publications où l'on peut trouver des renseignements sur un sujet donné.

Pour ce qui est de la numérotation du catalogue, il convient de signaler que:

- 1) le premier chiffre du numéro indique le grand groupe (fabrication, transports, etc.);
- 2) le deuxième chiffre représente le sous-groupe, par exemple, sous fabrication: textiles et vêtements, articles en bois;
- 3) le troisième chiffre marque la fréquence des publications: hors série, annuelles ou publiées plus d'une fois par année;
- 4) les quatrième et cinquième chiffres sont des numéros permanents propres à chaque publication.

Commandes de publications

Dans toute commande de publications du B.F.S., veuillez suivre les indications suivantes:

- 1) Adressez la commande à la Distribution des publications, Bureau fédéral de la statistique, Ottawa.
- 2) Indiquez le numéro de catalogue ainsi que le titre de la publication.
- 3) Envoyez le paiement avec la commande. Les chèques et les mandats se font à l'ordre du Receveur général du Canada. (Pour faciliter les choses, la Distribution des publications peut vous ouvrir un compte de dépôt chez l'Imprimeur de la Reine. Vous y déposez un montant minimum de \$10, duquel est déduit le prix des publications commandées par la suite.)
- 4) Vous pouvez vous abonner au service complet des publications et recevoir automatiquement toutes les publications du B.F.S. dès leur parution.
- 5) Pour plus de commodité, on peut également commander les publications du B.F.S. aux librairies de l'Imprimeur de la Reine dans l'une ou l'autre des villes suivantes: Halifax, Montréal, Ottawa, Toronto, Winnipeg, Vancouver.
- 6) Des remises sont consenties dans certains cas, notamment aux ministères de l'État, aux détaillants indépendants, aux bibliothèques et sur les commandes de 1,000 exemplaires ou plus. Pour plus de détails, veuillez communiquer avec la Distribution des publications, B.F.S.

Demandes de renseignements

Si vous savez quelle section du Bureau peut vous fournir des renseignements particuliers, adressez-vous à elle. Sinon, le mieux est d'envoyer votre demande de renseignements à la Section des renseignements, Bureau fédéral de la statistique, Ottawa (téléphone 992-2959, indicatif régional 613).

BUREAU FÉDÉRAL DE LA STATISTIQUE

Si vous communiquez avec le B.F.S. par l'interurbain, il est évidemment préférable que votre premier appel vous mette en communication avec la section du Bureau qui vous sera utile. Le Répertoire des services de renseignements reproduit ci-dessous renferme les numéros de téléphone le plus couramment utilisés par le public. Vu que les noms des fonctionnaires qui répondent aux demandes dans les différentes divisions sont sujets à modification, ils ne figurent pas dans le Répertoire et les numéros de téléphone sont inscrits selon les titres et les sous-titres des sujets le plus couramment traités. Si vous n'êtes pas certain de savoir qui appeler, veuillez communiquer avec la Section des renseignements.

3: MANUFACTURING — MANUFACTURES

Description of Reports

Publications listed under Manufacturing (Major Groups 3 and 4) are in general accord with the revised *Standard Industrial Classification*, upon which the annual Census of Manufactures has been based since 1960.

These publications consist of a number of periodic and annual reports which provide summarized and analytical information for manufacturing as a whole as well as an extensive series of annual reports on individual manufacturing industries. In addition, a number of monthly, quarterly and semi-annual reports which deal with certain commodities are listed.

Although the titles of the various reports are broadly indicative of the subject matter covered, explanatory notes have been included under title headings where necessary. Such notes are generally restricted to periodic or annual reports dealing with manufactures as a whole (sub-group 31) and to those periodic publications dealing with commodities. The annual reports on individual industries are generally similar in character and present the following principal statistics on the industry dealt with: number of establishments, average number of employees, salaries and wages, cost of fuel and electricity, cost of materials used, selling value of factory shipments and value added by manufacturing. Comparative statistics of this nature are given by province and Canada for earlier years.

Further detail is also given on the number of wage-earners by function, by sex and by months; fuel by kinds and electricity purchased and used (quantity and cost); power equipment; quantity and costs of various materials used: major products shipped with values f.o.b. establishment and quantity (where applicable).

Owing to the fact that annual surveys cannot be initiated until the end of the calendar year, as well as the time required to collect, edit and compile the extensive data presented, the annual industry reports are not usually available until a year or more after the end of the year reviewed. However, two-page preliminary bulletins, providing data on shipments of selected goods of own manufacture and on principal statistics by province are issued to subscribers as soon as the statistics on individual industries are compiled, often several months before the complete industry reports are available. In addition, many of the monthly, quarterly or semi-annual publications contain statistics on a much more current basis similar to those in the annual reports. This is particularly the case where the user is concerned with statistics of commodities such as production, shipments, inventories and orders. However, the user of such statistics should be aware of the differences between "industry" and "commodity" data which can result in apparent discrepancies in classification and coverage.

1961 CENSUS PUBLICATIONS

Final results of Canada's Tenth Decennial Census of 1961 are issued in the form of individual reports, comprising four main series, as follows:

- (1) **Advance Series.**—These reports provide summary information on specified basic topics for which there is wide demand, and were published earlier than the regular series of volume reports.
- (2) **Volume Series.**—Reports in this series represent the main results of the 1961 Census, and are prepared in such a way that the user can combine the contents to form the subject matter of each volume of the 1961 Census. A hard-covered binder, suitably titled, is supplied to those ordering at one time the complete set of reports for any given volume part.
- (3) **Special Series.**—This series contains some basic materials not included in the regular Volume Series, and which relate for the most part to more detailed geographical areas.
- (4) **Census Tract Series.**—Basic population and housing data are issued for each of the larger cities (or metropolitan areas) according to census tracts (i.e., areas of approximate uniformity in population size and composition).

This catalogue lists the publications of the 1961 Census issued in each of the foregoing series. In the event that further reports become necessary, they will be issued as supplementary publications in the Special Series, and will be listed in subsequent editions.

PUBLICATIONS DU RECENSEMENT DE 1961

Les résultats définitifs du dixième recensement décennal du Canada de 1961 sont publiés sous forme de rapports individuels formant quatre séries principales, que voici:

- (1) **Série anticipée.**—Ces rapports donnent des renseignements sommaires sur certaines données fondamentales très en demande; ils sont publiés plus tôt que la série régulière des rapports en volumes.
- (2) **Série des volumes.**—Les rapports de cette série donnent les principaux résultats du recensement de 1961 et se présentent de telle sorte que l'utilisateur peut les réunir et ainsi constituer la matière de chaque volume du recensement de 1961. Un auto-relieur à couverture rigide et portant le titre approprié est fourni à ceux qui achètent la série complète des rapports devant constituer un volume.
- (3) **Série spéciale.**—La série contient des données fondamentales qui ne paraissent pas dans la série régulière des volumes et qui ont trait pour la plupart à des régions géographiques plus détaillées.
- (4) **Série des secteurs de recensement.**—Des données de base sur la population et l'habitation sont publiées pour chacune des grandes villes (ou zones métropolitaines) par secteur de recensement (i.e., étendues à peu près uniformes quant à la taille et la composition de la population).

BUREAU FÉDÉRAL DE LA STATISTIQUE

Le présent catalogue indique les rapports du recensement de 1961 contenus dans chacune des séries mentionnées ci-dessus. Si d'autres rapports doivent être publiés, ils paraîtront à titre de publications supplémentaires dans la série spéciale, et seront mentionnés dans des éditions subséquentes du présent catalogue.

Census Tract Series

Individual reports in the 1961 Census Tract Series present basic population, housing, and labour force characteristics for statistical areas (i.e., census tracts) delineated within 23 of the larger urban communities and metropolitan areas. Each report contains an index map outlining the locations of these census tracts within the particular city or metropolitan area. (See also Catalogue No. 92-537 in the Volume I series.) In addition, the Census Tract Series includes composite reports for all cities dealing with: (1) the Population Sample; and (2) the Census of Merchandising.

Série des secteurs de recensement

Les rapports de la série des secteurs de recensement présentent des données de base sur la population, l'habitation et la main-d'œuvre pour les régions statistiques (i.e., secteurs de recensement) délimitées dans 23 des grandes agglomérations urbaines et zones métropolitaines. Chaque rapport contient une carte qui indique la situation de ces secteurs dans la ville ou la région métropolitaine. (Voir aussi le n° 92-537 au Catalogue dans la série du volume I.) En outre, la série des secteurs de recensement comprend des rapports globaux pour toutes les villes et traitant 1) de l'échantillon de la population, et 2) du recensement du commerce et des services.

Title, Subject and Commodity Index

This combined Title, Subject and Commodity Index has been designed to help users locate the required publications. It contains numerous cross-references. Numerical references are to catalogue numbers of the publications for which further descriptive information is provided in the main part of this catalogue. For English titles, all main words are capitalized.

While this index contains several thousand references to subject and commodity data, not all subjects and commodities covered in the Bureau's current publications are listed. Excluded are the commodities covered in export and import statistics, which are adequately indexed in Volume III of the Export and Import Commodity Classifications (Catalogue Nos. 12-523 and 12-526).

Again, the publication "Products Shipped by Canadian Manufacturers" (Catalogue No. 31-211), contains a detailed alphabetical list of commodities manufactured in Canada, showing value and amount of production for the year covered. No reference is made to the publication in the index, except where the production statistics are not shown in any other publication. However, users may assume that manufactured commodities entered as appearing in other reports also appear in 31-211.

In the case of other omissions, the entries for related items often afford a clue to where information, if available, may be found. Lastly, the Bureau's coverage is increasing and those who cannot locate what they seek should send an inquiry to the Inquiries Section, Information Division.

Index des titres et des matières

Cet Index général des titres et des matières a été conçu en vue d'aider les utilisateurs à trouver les publications qu'ils désirent. Il contient de nombreux recoupements. Les références numériques renvoient aux numéros de catalogue des publications au sujet desquelles la partie principale du catalogue donne des renseignements plus détaillés. Dans le cas des titres en anglais, tous les principaux sont en majuscules.

Bien que l'Index contienne plusieurs milliers de références à des sujets et à des denrées, tous les sujets et toutes les denrées mentionnées dans les publications régulières du Bureau ne sont pas énumérés. Sont exclues les denrées qui paraissent dans la statistique des exportations et des importations, qui est suffisamment indexée dans le Volume III de *Export and Import Commodity Classification* (n^{os} de catalogue 12-523 et 12-526).

En outre, le rapport détaillé intitulé «Products Shipped by Canadian Manufacturers» (n^o 31-211) contient une liste alphabétique des denrées fabriquées au Canada, qui donne, en outre, la valeur et le volume de la production pour l'année observée. L'index ne contient pas de renvois à la publication, sauf lorsque la statistique de la production n'est pas publiée ailleurs. Cependant, les utilisateurs peuvent supposer que les chiffres des denrées fabriquées parus dans d'autres rapports figurent aussi dans le n^o 31-211.

Dans le cas d'autres omissions, les articles qui s'y apparentent indiquent souvent où, s'ils existent, on peut trouver les renseignements. Finalement, le nombre de publications du Bureau augmente sans cesse et ceux qui ne trouvent pas ce qu'ils cherchent devront communiquer avec la Section des renseignements de la Division de l'information.

Part II—Data Files and Unpublished Information

Part II of this catalogue consists of two main elements, data files and information apart from data files which is generally described as unpublished information. This latter is information which may be useful to a limited number of individuals or organizations, but which is not published because the interest in it is not considered to be sufficiently broad.

Data files include summary tapes and punch card decks. In cases where costs are not indicated, estimates of cost will be provided before the work is undertaken. The charge for punch card decks is basically \$3 per thousand plus an additional \$2 per thousand on the number interpreted.

Unpublished information includes special tabulations, copies of special statements, computer printouts, and so on. Like all information issued by DBS, however, unpublished information is subject to the limitations of the Statistics Act which prevent the disclosure of information on individual persons or companies. In instances where the request can be met without a considerable amount of time and effort involved, there is no charge. In cases where the work to be done is substantial, or a special tabulation is needed, a charge may be made, but in most cases it is not large. In cases where charges are not specified in this catalogue, an estimate of cost will be provided before the work is undertaken.

Some unpublished non-statistical information, technical papers and maps such as census maps are also available.

Your dealings in all cases would be with the director of the subject area division which produces the information you are interested in. The directors' titles and addresses are provided at the end of each description of the material.

CENSUS

Computer print-outs and summary tapes containing basic data from the 1961 and 1966 Censuses for enumeration areas are available. An enumeration area is defined as the area covered by one enumerator and generally ranges in size from 200 to 800 population. Since they are mainly administrative units, their numbers, size, and boundaries vary from census to census. Moreover, census statistics on this basis require extreme caution in their interpretation; statements on the quality of the data are available on request. Available data cover population, household, family and labour force distributions for the 1961 Census and population, household and family for the 1966 Census.

Printed descriptions of the boundaries of the enumeration areas of the 1961 and 1966 Censuses can be ordered at the unit price of 50¢ for all enumeration areas per electoral district, or \$100 for the complete set of some 30,000 areas (1961) and 36,000 areas (1966) in the 263 electoral districts of Canada. These descriptions include statements of the total

count of population and households for each enumeration area and will meet requirements where geographical distributions of population or households by small areas only are required.

For all rural parts of Canada, maps of electoral district series showing the enumeration area boundaries of the 1966 Census can be made available. For the larger urban centres (i.e. those which have been delineated into census tracts), individual maps are available for each census tract showing the enumeration area boundaries within that tract. Maps in either of these two series can be ordered at the unit price of 50¢ per copy. For enumeration areas in the smaller cities and towns, not covered by these map series, the printed descriptions of boundaries are available only. Also, maps showing boundaries of enumeration areas are not available for the 1961 or earlier Censuses.

Computer Print-Outs

Enumeration area data can be made available either from the 1961 Census or the 1966 Census on 14 sets of computer print-outs. Any one of the 14 sets can be ordered at the unit price of \$2 for all enumeration areas in a given electoral district (based on the 1952 re-distribution). If certain sets are in short supply, it may be necessary for some cases to provide "readable negatives".

4. How to order

Orders for any of the foregoing computer print-outs should be sent to the Director, Census Division, Dominion Bureau of Statistics, No. 8 Temporary Bldg., Carling Avenue, Ottawa. Requirements should be stated insofar as possible in terms of electoral districts. If individual cities or metropolitan areas are required, data for the closest corresponding electoral districts will be sent. An invoice will be mailed to the purchaser at the time the order is filled. Remittance should be made by cheque or money order payable to the Receiver General of Canada. Deposit accounts with the Queen's Printer for printed publications cannot be used in payment for these special materials.

Computer Summary Tapes

Computer summary tapes at the enumeration area level contain the tabulated data of the different variables included in the main census tabulation program, generally without cross-classification of any kind except by sex, where applicable. These summary tape records cannot be used to produce tabulations additional to the distributions already appearing on the tapes. However they can be further processed by computer methods to: (a) produce totals for different types of geographical areas and for additional summarizations of variables by using the enumeration area distribution as "building blocks"; or (2) compute derived measures such as ratios and averages using the tabulated distributions where applicable.

Straight reproductions of existing enumeration area summary tape files of the 1961 and 1966 Censuses can be made available to users at cost, plus the provision of a sufficient number of blank reels of tape on which to reproduce the required files. One set of tape record descriptions is supplied with each reproduced tape file. A brief description of each of the tape files available from the 1961 to 1966 Censuses follows.

Il s'agit de renseignements qui peuvent servir à un nombre restreint de particuliers ou d'organismes, mais qui ne sont pas imprimés parce que le nombre des utilisateurs n'est pas jugé suffisant.

Les documents mécanographiques se composent de bandes récapitulatives et de jeux de cartes perforées. Dans les cas où le prix n'est pas indiqué, on fournira une estimation du coût avant d'entreprendre les travaux. Le prix de base des jeux de cartes perforées est de \$3.00 les 1,000 cartes, prix auquel il faut ajouter \$2.00 suivant le nombre de données interprétées.

Les renseignements non publiés se présentent sous forme de tableaux spéciaux, de reproductions d'états spéciaux, d'états mécanographiques, etc. Comme toute l'information publiée par le B.F.S., toutefois, les renseignements non imprimés sont assujettis aux restrictions de la loi sur la statistique qui défend de divulguer des données individuelles concernant les particuliers ou les sociétés. Si la réponse à une demande de renseignements n'exige pas trop de temps et de travail, elle est donnée gratuitement. Si elle exige beaucoup de travail ou une mise en tableau spéciale on mettra les frais en compte, mais dans la plupart des cas ces frais ne seront pas élevés. Dans les cas où le présent catalogue ne mentionne pas les frais, on fera connaître au client le prix estimatif avant d'entreprendre le travail.

Des renseignements non imprimés de nature non statistique, des documents techniques et des cartes de recensement et d'autres cartes géographiques semblables sont également disponibles.

Dans tous les cas, on voudra bien s'adresser au directeur de la division dont relèvent les renseignements désirés. La fonction et l'adresse des directeurs figurent à la fin de la description du document.

RECENSEMENT

Des états mécanographiques et des bandes récapitulatives qui contiennent les données de base des recensements de 1961 et de 1966 par secteur de dénombrement, sont disponibles. Le secteur de dénombrement est le secteur d'un agent recenseur, et il compte en général entre 200 et 800 habitants. Vu qu'il s'agit avant tout de divisions administratives, le nombre, la dimension et les limites des secteurs varient d'un recensement à l'autre. En outre, il faut interpréter avec une extrême prudence les données de recensement établies sur cette base; il existe des exposés sur la qualité des données, que l'on peut se procurer sur demande. Les données dont on

dispose visent la population, les ménages, les familles et la répartition de la main-d'œuvre au recensement de 1961, et la population, les ménages et les familles au recensement de 1966.

On peut commander, au prix de 50¢ l'exemplaire des descriptions imprimées des limites des secteurs de dénombrement aux recensements de 1961 et de 1966 pour tous les secteurs de dénombrement par district électoral, ou encore l'ensemble complet des descriptions des quelque 30,000 secteurs (1961) et 36,000 secteurs (1966) des 263 districts électoraux du Canada au prix de \$100. Elles comprennent une indication du nombre total d'habitants et de ménages par secteur de dénombrement, et répondront aux besoins dans les cas où l'on aura besoin de la répartition géographique de la population et des ménages par petits secteurs seulement.

Pour ce qui est des régions rurales du Canada, on peut se procurer les cartes des secteurs de dénombrement, de la série des districts électoraux pour le recensement de 1966. Quant aux grandes agglomérations urbaines (soit celles qui ont été réparties en districts de recensement) il existe des cartes des secteurs de dénombrement pour chaque district de recensement. On peut commander des cartes de l'une ou l'autre des deux séries au prix de 50¢ l'exemplaire. Il n'y a pas de cartes de cette série dans le cas des secteurs de dénombrement des villes de moindre importance; seules les descriptions des limites peuvent être obtenues. De même, les cartes de dénombrement du recensement de 1961 et des recensements antérieurs, ne sont pas disponibles.

États mécanographiques

Le Bureau peut établir sous forme de 14 jeux d'états mécanographiques les données sur les secteurs de dénombrement du recensement de 1961 ou de celui de 1966. On peut se les procurer, au prix de \$2 chacun, pour tous les secteurs de dénombrement d'un district électoral donné (d'après la nouvelle répartition de 1952). Si certains étaient épuisés, il faudrait utiliser dans certains cas des «négatifs lisibles».

4. Commandes

Les commandes d'états mécanographiques doivent être adressées au directeur de la Division du recensement, Bureau fédéral de la statistique, Édifice n° 8, Avenue Carling, Ottawa. Il faudrait autant que possible préciser dans les demandes les districts électoraux en cause. S'il s'agit de villes ou de régions métropolitaines particulières, on enverra les données des districts électoraux s'en rapprochant le plus. La facture est envoyée à l'acheteur au moment où la commande est remplie. Le paiement se fait par chèque ou mandat au nom du Receveur général du Canada. Le prix de cette documentation spéciale ne peut être débité aux comptes de dépôt chez l'Imprimeur de la Reine, destinés aux publications imprimées.

États récapitulatifs sur bande magnétique

Les états récapitulatifs sur bande magnétique par secteur de dénombrement, permettent d'obtenir, sous forme d'états mécanographiques, les différentes statistiques établies grâce au programme mécanographique du recensement. En général ces bandes ne donnent aucune classification recoupée, sauf celle par sexe, quand il y a lieu. Ces fichiers récapitulatifs sur bande ne permettent pas d'obtenir des tableaux autres que ceux qui sont prévus sur les bandes. Toutefois, les bandes peuvent être elles-mêmes taillées mécanographiquement et on aura ainsi: a) les totaux pour des types différents de régions géographiques ainsi que pour d'autres combinaisons de variables (en combinant les distributions par secteur de dénombrement); b) des renseignements dérivés comme les pourcentages et les moyennes à l'aide des distributions données dans les tableaux quand il y a lieu.

Les usagers peuvent obtenir à titre onéreux les reproductions directes des états récapitulatifs sur bande magnétique par secteur de dénombrement des fichiers des recensements de 1961 et de 1966, moyennant la fourniture d'un nombre suffisant de bobines vierges de bande magnétique pour enregistrer les renseignements demandés. Un jeu de bandes descriptives accompagne chaque fichier de bandes. Une brève description de chaque fichier de bandes fondé sur les recensements de 1961 et de 1966 figure ci-dessous.

Statistics are available from the Water Transport Unit on the origin and destination of both foreign and coastwise cargoes loaded and discharged at seventeen Canadian ports. These ports were selected due to their importance as distribution and receiving centres for a wide variety of cargoes. The seventeen ports that annual data are compiled for include: Bell Island, Corner Brook, Hantsport, Sydney, Baie Comeau, Port Alfred, Port Cartier, Sept-Îles, Sorel, Trois-Rivières, Port Colborne, Sarnia, Sault Ste. Marie, Windsor, New Westminster, Powell River and Victoria. This information supplements similar statistics for the eight principal Canadian ports published in *Shipping Report, Part IV, Origin and Destination for Selected Ports*. (Catalogue No. 54-206). Additional Water Transportation data are available on request.

Other Sections and Units within the Division; Public Utilities Section, Aviation Statistics Centre, the Road and Rail Transport Units have additional information available in their subject fields. Although these data are not precompiled or arranged in a published format, such information may be made available depending on time and resources, the subject matter under consideration and the confidentiality limitations of the Statistics Act.

Statistical Publications of Other Federal Government Departments and Agencies.

While the Dominion Bureau of Statistics as the national statistical agency publishes statistics on nearly all subjects, there are a number of statistical publications regularly issued by other government departments and agencies. The list below grouped by a subject arrangement similar to that in the main body of this catalogue, lists those which are of general interest and which are supplementary sources to DBS publications on the subject. Priced publications are available from the Queen's Printer, except those of the Bank of Canada. Free publications can be obtained by writing to the Information Division of the Department publishing them.

Publications statistiques d'autres ministères et organismes de l'État

Bien que le Bureau fédéral de la statistique, en tant qu'organisme national de la statistique, publie des données sur presque tous les sujets, d'autres ministères et organismes de l'État publient régulièrement des documents statistiques. Les titres ci-après, répartis par sujet suivant la même disposition que dans le corps du catalogue, sont des publications d'intérêt général et constituent des sources supplémentaires de renseignements sur des sujets donnés. Les publications peuvent s'acheter chez l'Imprimeur de la Reine, sauf celles de la Banque du Canada. On peut obtenir les publications gratuites en écrivant à la Division de l'information du ministère intéressé.
